

## pd Training Course

By Dr. Sansanee  
Notetaker: Dr. Patcharaporn Gavila  
Dentist Professional level

The two experts from WHO meet each other at ICOH which is Dr. Daryl Beach and Dr. Heikki Tala in 1984 in Community care model project. They were GEPEC (Global Engineering Promotion Education Collaborative) founder and GEPEC director. They identified with concepts for systematic health care in a global-local perspective.

This is something that we've had at the center which is bamboo bed for doing mouth care in the rural area in Thailand. It's very practical because at that time we don't have enough dentist in Thailand, so we have like primary care workers and this is what they are doing at that time (1984)

This is the first pd dental clinic in the world at ICOH, Chiangmai, Thailand. It's the setting for first-level referral care and it's still there, you should visit. And it's been there since 1984, so you can calculate the number, how many years of it. This pd dental unit are made from J Moritta company.

At that time, there are many guests that come to visit our project at ICOH. One of our guests gave a strong comment about more than 30 years ago which is Dr. Jaque Varre. "You have everything here like pd unit, sim lab and other things. But your dentist still working in improper position, why don't you do anything to help your dentist" So after that we've tried to have pd training course in ICOH, we have the trainer or facilitator to train that course. At that time we send 2 dentists to LAN centre, OSAKA for 2 weeks training. When they came back, they bring many kind of simulator mouths to the center. This simulator mouth is very necessary for training in pd and it's very expensive if you buy from Japan.

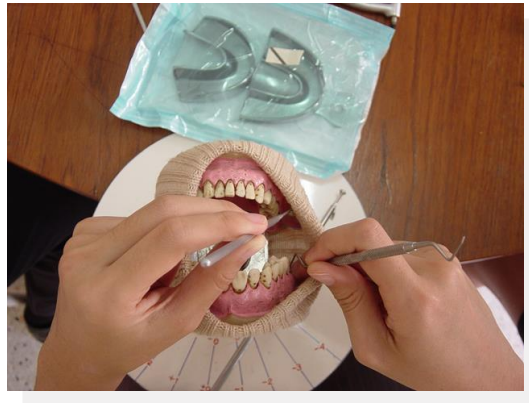

And this is what we do at that time to open the pd training course

We are also produce our own simulating mouth in very low price because if we don't have this kind of things we can't open the course for training. This is our ICOH simulating mouth that we call "sim kit"

And this is simulating caries model or "sim caries"

SIM KIT

SIM CRIES

For the last things that I think that I'm succeed is sending him (Dr. Mansuang Wongsapai) to train with Dr. Beach for 3 months, so I can get myself retired quietly and left everything on him.

DR. MANSUANG WONGSAPAI
